Experience

FiveAges, Embodied AI Algorithm Intern
Beijing, China
Mar 2026 – Aug 2026
6 months

Embodied AI Algorithm Team; supervised by Prof. Yan Huang.

- Researched and engineered Vision-Language-Action (VLA) models for embodied intelligence applications.
- Supported deployment and validation of VLA models on real robotic systems, connecting model development with practical robot execution.
- Co-first-authored BridgeVLA++, a data-efficient, generalizable, and memory-augmented VLA framework for 3D manipulation (arXiv:2608.05042).

Institute of Automation, Chinese Academy of Sciences (CASIA), Research Intern
Beijing, China
July 2025 – Jan 2026
7 months

State Key Laboratory of Multimodal Artificial Intelligence Systems; supervised by Assoc. Prof. Junyu Gao and Prof. Changsheng Xu.

- Developed a self-correction framework for Vision-Language Navigation (VLN) in continuous environments using environmental feedback.
- Built the main experimental codebase and conducted data analysis, ablation studies, and benchmark comparisons.
- Evaluated the method on R2R-CE and RxR-CE, supporting a second-author paper accepted to ICML 2026.
